PHILCONGEN LA MEETS FORMER CALIFORNIA SENATOR RAY HAYNES AND OFFICIALS OF OMSTAR ENVIRONMENTAL PRODUCTS DX1

Photos taken during the call of former California Senator Ray Haynes (left photo 2nd from L) on Consul General Adelio Angelito S. Cruz.

28 February 2018 - On 21 February 2018, Consul General Cruz, met with Richard Skaggs and George Paskalov President and Chief Scientist respectively of OMSTAR Environmental Products DX1 (OMSTAR). OMSTAR develops and manufactures performance-enhancing additives for fuels.

In their presentation, Skaggs mentions that OMSTAR started in 1986 as “Omstar D-1280X, Inc.” and has been incorporated since 1989. It has customers worldwide, including Sumifru, Philippines, Coca Cola FEMSA Philippines, Philippine Coast Guard, San Miguel Brewery, Philippines and Victory Liner, Inc., Philippines. He also mentioned that they have a Philippine distributor for their products.

Paskalov mentioned the that by using their additives, four things happens to motor engines: (1) improved fuel economy, (2) dramatically reduced harmful emissions (3) Clean engines, fuel systems, furnaces, boilers, and exhaust stacks and (4) Improved lubricity with “metal soap,” a non-oil super-lubricant. He cited the experience of the Philippine Coast Guard as an example. When the Philippines Coast Guard tested DX1 on ships and rescue vessels with a 25% reduction in heavy fuel oil consumption. The additive completely dissolved the heavy asphaltenes in the bottom of the fuel tanks, and cleaned the fuel system.

Another example is Sumifru Philippines. A fuel economy test of large diesel trucks resulted in a 13% reduction of diesel fuel consumed. According to Paskalov, SumiFru is expanding use of DX1 to its entire truck fleet, as well as boilers and generators. END.
